

Working For California Independence

CALIFORNIA NATIONAL .PARTY

- California is dramatically under-represented within the United States, yet forced to pay billions in subsidies to other states.
- With the fifth largest economy in the world and a population larger than most independent nations, we have everything we need to succeed.
- Independence allows us to establish a government that represents our best interests and reflects our values.

Platform for Prosperity:

A comprehensive plan to grow California's economy, super-charge our key industries, and ensure our economic future.

Platform for Growth:

Proposals to improve transportation and end freeway gridlock, get housing costs under control through better urban planning and growth, permanently solve our water crisis, and ensure that California's infrastructure sustains our long-term growth.

Peace and Defense:

Defending our freedom without conquering the world.

Universal Healthcare:

A market-based universal health care system that can cover all Californians and provides significant savings for businesses and individuals.

Rule of Law:

Civil rights, rights to privacy, and freedom of the press.

Judicial Reform:

Eliminate police brutality and support the majority of officers who are doing their best to serve our communities.

Education:

School reform to create equality of opportunity for our young people and support California's high-tech economy.

Immigration:

The United States government has abdicated its responsibility to deal with immigration; current laws are not enforced or enforceable. We advocate a fair, common-sense solution that allows people to come to California and work within a framework of enforceable laws.

Equality:

The CNP includes a core commitment to equality and social justice in all planks of our platform. This section gathers all those proposals together in one place.

Independence:

A peaceful constitutional approach to independence in line with international law.
